Job Description			
<p>ROLE AND RESPONSIBILITIES</p> <p>Our Building Services department has an immediate opening for a designer position. The Designer will be responsible for carrying out drafting and design duties for our Mechanical, Electrical, Plumbing, and Technology (MEPT) group. This unique position would best fit an individual with experience on both the Mechanical and Electrical side of design. Design production will be completed utilizing Revit software. Additional understanding of building construction, architectural assembly, and plan creation a plus. Training can be provided for the position but the ideal candidate will come from a background of designing these systems. Collaboration with architectural partners, clients, and colleagues is critical. The ideal candidate will possess the following traits that will help them thrive in our close-knit work environment: self-starter, problem-solver, creative, dependable, communicative, collaborative, courteous, and detail oriented.</p> <p>The primary role for this position will be building systems design. Working with our engineering team the candidate will provide multi-disciplinary design services in MEPT. In this position you will be working closely with a small engineering staff on a daily basis to complete design and project coordination tasks. The vast majority of work will be completed using Autodesk REVIT (2020-2023.) Knowledge of Navisworks and Insight also a plus.</p> <p>Axiom Consultants provides a unique, employee-centric work environment where employees are encouraged to focus on quality deliverables, and support of one another in a collaborative fashion. Problem solving and creativity and rewarded. Our small, multi-disciplinary teams tackle projects both large and small for a diverse range of clients. All of our employees engage in field and office tasks and have an opportunity to engage with clients in project coordination and management duties.</p>			
REQUIRED EDUCATION AND SKILLS			
Associates Degree		Autodesk Revit	
PREFERRED EDUCATION AND SKILLS			
Bachelors Degree in Engineering/Arch Field (or related) HVAC Design Experience Plumbing and Piping Design Experience		Electrical Design Experience Technology Design Experience Navisworks/Insight
