Job Description

ROLE AND RESPONSIBILITIES

Our Civil Services department has an immediate opening for a designer position. The Designer will be responsible for carrying out drafting and design duties for our Civil Engineering and Survey divisions. This position will serve under the guidance of our senior-level Designer and the associated engineering staff within the division. Some training may be expected for this position but the candidate should already possess good civil site design skills. Collaboration with clients, contractors, and our building services co-workers is critical. The ideal candidate will possess the following traits that will help them thrive in our close-knit work environment: self-starter, problem-solver, creative, dependable, communicative, collaborative, courteous, and detail oriented.

Primary role for this position will be civil infrastructure and site design. Working with our civil engineering team the candidate will provide complex design services for earthwork, grading, stormwater, water, sanitary sewer, stormwater, erosion control, traffic control, demolition, and other related areas. The candidate should have previous experience working on complex site design, creating plans and profiles, and developing designs that meet local standards. The vast majority of work will be completed using Autodesk Civil3D.

Axiom Consultants provides a unique, employee-centric work environment where employees are encouraged to focus on quality deliverables, and support of one another in a collaborative fashion. Problem solving and creativity are rewarded. Our small, multi-disciplinary teams tackle projects both large and small for a diverse range of clients. All of our employees engage in field and office tasks and have an opportunity to engage with clients in project coordination and management duties.

REQUIRED EDUCATION AND SKILLS

Associate's Degree

Autodesk Civil3D Experience

PREFERRED EDUCATION AND SKILLS

Bachelors Degree in Engineering or Similar Field
Project Coordination Experience
Land Survey and Staking Experience

SUDAS Design Standards Knowledge/Experience
Municipal Zoning Codes Experience/Expertise
Infrastructure/Site Design Experience
